Annual Water Quality Report Available Online

Palm Beach County Water Utilities Department (PBCWUD) is committed to educating customers about the utility's treatment process and water quality standards. PBCWUD's recently published annual Consumer Confidence Report (CCR), also known as the Water Quality Report, is available to utility customers both online at pbcwater.com/waterquality and linked through utility customers' bills. The report shows that PBCWUD had zero water quality violations for 2024.

PBCWUD's team of industry professionals distributes more than 60 million gallons per day of high-quality drinking water to over 635,000 residents located within 1,300 square miles of Palm Beach County. In 2024, PBCWUD conducted more than 50,000 water quality analyses to ensure it continued to meet and exceed all federal and state water quality standards throughout the distribution system. The utility's central laboratory, accredited by the National Environmental Laboratory Accreditation Conference, operates seven days a week to ensure rigorous quality standards and regulatory compliance measures are met.

PBCWUD's Annual Water Quality Report is a simple and clear snapshot of the utility's commitment to delivering the best water to the residents it serves. To view the report online, visit pbcwater.com/waterquality. To request a printed copy, email your name and mailing address to WUDPR@pbcwater.com.

For the most up-to-date information concerning the PBCWUD, visit pbcwater.com to sign up for the email newsletter and receive the latest news to your inbox.
