

American Heart Association Metabolic Syndrome Awareness Campaign and Survey

“Do you know that Metabolic syndrome can raise a person’s risk of coronary heart disease, diabetes, stroke, and other serious health problems?”

As part of the American Heart Association’s Health Equity Council we are developing a Metabolic Syndrome awareness campaign and we need your help to collect baseline information about awareness of Metabolic syndrome in Palm Beach County using a brief survey. As part of this survey, there is also an opportunity for anyone living with metabolic syndrome to share their story and be entered into a raffle to earn a gift card.

We are asking that you please share the visuals attached along with a hyperlink to the survey on social media and newsletter. Here is the survey link: <https://form.jotform.com/221674958098169>

Thank you for your support! ”

With Heart,
Sheree
