Eligible Projects

Structure Elevation

Physically raising an existing structure.

Mitigation Reconstruction

The construction of an improved, elevated building on the same site where an existing building and/or foundation has been partially or completely demolished or destroyed. These activities result in the construction of code-compliant and hazard-resistant structures. Mitigation Reconstruction is the alternative to Structure Elevation when the structure is not sound enough to elevate, as determined during application review.

Acquisition/Demolition

A structure is purchased from voluntary sellers and demolished, to be maintained by the local community as open space. The local community must agree to participate in this project type.

Wind Mitigation

Measures that reduce the risk of future wind damage to structures. This may include alterations to roofs, windows, doors, and other vulnerable components of structures.

- The total construction cost for each property will be determined during the initial review period based on factors such as project type, square footage of living space, foundation and construction type, and any necessary project activities.
- Approved property owners will receive a detailed breakdown of their construction cost-share and will have time to decide if they would like to move forward with the project's next phase.
