# Virtual Symposium on Gene Therapy Begins TOMORROW

Last Chance to Register!

The Foundation for Sickle Cell Disease Research will host the Virtual Symposium on Gene Therapy, showcasing groundbreaking advancements in the fight against sickle cell disease.

This one-day symposium begins tomorrow, March 13, 10 a.m. to 5:30 p.m. Participants will earn up to 5.5 CME credits.

The following topics will be discussed:

- **The Science of Gene Therapy**, presented by Mark C. Walters, M.D.
- **A Patient-Centered Approach to Accessing Curative Therapies**, presented by Julie Kanter, M.D.
- **Gene Addition Gene Therapy and Current Limitations**, presented by Alexis Thompson, M.D., MPH

- **Access to Curative Therapies**, presented by Jennifer Adair, Ph.D.
- **Future Directions of Gene Editing**, presented by Daniel E. Bauer, M.D., Ph.D.

Designed for healthcare professionals, the symposium brings together top researchers, clinicians, and industry leaders to explore the latest innovations, challenges, and real-world applications of gene therapy. It offers a unique opportunity to gain practical insights and stay at the forefront of this transformative field.

Don't miss your chance to deepen your understanding and discover how gene therapy is reshaping the future of sickle cell treatment. Register today!

### Last Chance to Register!

Clockwise from top left: **Mark C. Walters**, M.D.; **Julie Kanter**, M.D.; **Alexis Thompson**, M.D., MPH.; **Daniel E. Bauer**, M.D., Ph.D.; **Jennifer Adair**, Ph.D.; and **Haydar Frangoul**, M.D., M.S.
