FOOD FOR THOUGHT

Did You Know?

The Palm Beach County School District is the 11th largest in the continental US and the 5th largest in the state of Florida with 185 schools. The kids speak close to 200 different languages/dialects.

The Host Committee of the Agricultural Summit has invited 250 students to be their guests at the event on May 4th. They'll be able to get up close and explore heavy farming equipment, hear about the lives of bees and the importance of pollination, talk to a naturalist about barn owls, learn first-hand about hydroponic gardening, see exciting robotics demonstrations, make ultra-nutritious snacks with the Fresh

from Florida chef team, and watch as the ag-drones launch and fly overhead.

Summit Mission:

The one-day forum is presented by diverse stakeholders in Palm Beach County's business community to educate the public about modern agriculture in the county and state, and its foundational role in advancing our quality of life and driving local, regional, national and global economies.
