

A Phenomenological Study: Lived Experiences of Black Parents and Guardians Through the ASD Identification Process

Recruiting parents and/or guardians for one-to-one interviews, as part of a research project to better understand the lived experiences of Black parents and guardians through the autism spectrum disorder identification process.

To participate, you must:

- Reside in Florida.
- Be a parent/guardian of a Black child (of any age) identified with autism

When: March 2021 through September 2021

Where: Online via Zoom-Password Protected Platform
